

Seam testing station

to check the watertightness of seam-sealed/welded seams (based on DIN EN 20811)

- Quick opening and closing of the testing plate
- Connection to pressure hose or with hand pump
- Guidance value can be initialized with the pneumatic versions
- Water tank with level indicator
- Water-drain-connector for leakage water
- Safety valve (1bar) with the pneumatic versions
- Inlay to prevent pushing-through while testing

100% proof?!
